### Introducing the Taco LeakBreaker Water Heater Shut-Off

The Taco LeakBreaker™ is a water heater leak protection device that protects against flood damage from the containment failure of a water heater. It consists of a control unit, a valve with actuator and a sensor. This resettable, testable protection device can be installed on any style water heater to shut off the incoming water supply, preventing additional water flow to a damaged water heater. The two-color LED light and audible alarm lets you know the status of LeakBreaker at all times.

Eligible water heaters:

- PE 40
- PE 50
- HP 50
- HP 65
- HP 80
